SMUD is partnering with GRID Alternatives to offer a free, paid certificate training program to help propel you into an exciting career in the solar energy industry! During this comprehensive four-week course you'll get vital online classroom instruction and hands-on experience as you develop the skills solar industry employers are looking for, including:

- Fall protection and job site safety
- First aid and OSHA 10 Certification
- Array layout
- Electrical wiring and mounting
- Conduit bending and installation
- Racking and mounting installation
- Monitoring and communication

You must be 18 or older to enroll, and successfully complete two weeks of distance learning coursework to become eligible for two weeks of hands-on training.*

*Only online learning is available until the training center can safely re-open.

You'll earn \$200 once you complete the initial online training and \$800 upon completion of the hands-on training. Course graduates will have access to potential employment opportunities with top solar firms.
